

Instructor: Dr. Thomas P. Keenan, FCIPS, I.S.P.

Contact Information: [keenan@ucalgary.ca](mailto:keenan@ucalgary.ca) 403 2207437

Office: PFB 4184

Office hours: online via email and by appointment

*An examination of the central concepts of environmental design, delivered in an online format. Topics include: the natural, built and human environments, and interdisciplinary issues.*

## **Introduction**

Design is everywhere. It is part of your everyday communication, your household, your workplace. Design is also a complex concept. It is both a process and the result of that process -- the shape, style and meaning of environments that have been designed. Many factors influence the design process: the location, the environmental issues, the relationship with its surroundings, the ideas of the designer, technological determinants, the cultural context that gave rise to the need for the project in the first place and finally the social, economic, political and the legislative context that will frame the design. New tools, such as augmented reality are continually being developed that change the nature of our practice.

Environmental Design is concerned with the natural, built and human environments and focuses on fashioning physical and social interventions informed by human behavior and environmental processes. Therefore, it includes fields such as architecture, planning, urban design, environmental science, product design, technology and landscape architecture.

## **Objectives**

1. To achieve an evidence-based, holistic understanding of the issues relevant to environmental design;
2. To acquire basic skills in the various disciplines of environmental design;
3. To understand how an interdisciplinary approach can be used to solve complex problems;
4. To apply "design thinking" to a small but important problem of personal interest;
5. To become familiar with the various career paths and educational options relevant to the fields of Environmental Design.

## Teaching Approach

This course will be offered online using the University of Calgary Desire2Learn (D2L) platform, which is where all course documents will be located. All assignments are to be submitted electronically through the D2L system, and comments and grades will be returned through D2L.

The course will be divided into four broad topic areas -- natural, built, human (social and cultural environment) environments, and interdisciplinary aspects. It will utilize short video lectures by experts in their relevant area of expertise followed by study of and individual response to online materials.

Assignments related to each major topic area **will be due on a weekly basis** (see schedule.) Learners will need access to the Internet and a computer capable of playing video and audio content. Suitable facilities are available on campus (e.g. at the TFDL) though, of course, your own computer, smartphone, tablet, etc. can be used.

## Readings

All required readings will be provided on D2L, though students are free to consult additional resources and to cite them. The use of references, where appropriate, is encouraged in this course, and will be considered in grading.

## Special Budgetary Requirements

None

## Content: Topic Areas & Detailed Class Schedule (subject to change)

*Course week generally starts each Wednesday and generally ends the following Wednesday at 2359. To be considered on time please submit your assignment by that time.*

There will be no class activity from November 11-17, 2018 because of Term Break. The due dates for the assignments are adjusted accordingly.

Late assignments will be accepted up until the Final Deadline (December 6, 2017 @2359) but may **be penalized for lateness**. Please try to keep up!

The week by week course topics are shown below, but are subject to change, e.g. we have some new faculty members joining EVDS who might also provide lectures. So please *consult* the online material for each week as it is opened up *on D2L each Wednesday*.

Week	Start Date	Topic	Presenter	Asst. due
1	Sept 6	Intro to course and to Architecture	Dr. David Monteyne	Sept 19 @2359
2	Sept 19	E-visit to an Architecture Firm	Prof. Marc Boutin	Sept 26 @2359
3	Sept 26	Critical Residential Practice	Prof. John Brown	Oct 3 @2359
4	Oct 3	Landscape Architecture	Dr. Nancy Pollock-Ellwand	Oct 10 @2359
5	Oct 10	Smart Communities	Dr. Tom Keenan	Oct 17 @2359
6	Oct 17	Sustainable Cities	Dr. Noel Keough	Oct 24 @2359
7	Oct 24	Urban Design	Dr. Bev Sandalack	Oct 31 @2359
8	Oct 31	Industrial Design	Prof. Denis Gadbois	Nov 7 @2359
9	Nov 7	Technology	Prof. Barry Wylant	Nov 21 @2359
10	Nov 15	Visualization	Dr. Richard Levy	Nov 21 @2359
11	Nov 21	Environmental Science	Dr. Mike Quinn	Nov 28 @2359
12	Nov 28	Lifecycle Assessment	Dr. Getachew Assefa	Dec 5 @2359

**FINAL DEADLINE**

**Dec 6, 2018 @2359**

## Means of Evaluation

The final grade in this course will be based on assignments and participation in online class discussions. Students will complete a weekly written assignment as per the schedule, and submit it electronically. Late assignments will be accepted up until the **Final Deadline of 2359, December 6, 2018**, but may be penalized up to one full grade (e.g. A to B). Assignments not submitted by the final deadline will receive a grade of F.

Class participation will be evaluated based on the quality and quantity of online D2L discussion, which should build upon the topics presented in that week. Posting of relevant resources that may be helpful to the other students in the class is particularly encouraged. **To obtain full marks in the participation component, students should make at least one timely, thoughtful, relevant, interesting and non-trivial posting each week.**

There is no final examination.

Writing quality (clarity, spelling, grammar, etc.) will form part of the basis for assignment and discussion evaluation.

## Weighting

**12 assignments @ 7.5% each for a total of 90%**

**Class participation on a regular basis, over the term, 10%**

**Total 100%**

Final grades will be reported as letter grades, with the final grade calculated according to the 4-point range used by the Faculty of Environmental Design. Assignment and participation grades will also be reported as letter grades (A+, A, A- etc.) Percentage grading will not be used in this course. It is not necessary to pass any particular component to pass the course as a whole.

Grades are to be interpreted according to the chart shown below, which is the official grading scheme of the Faculty of Environmental Design. **Please note that this grading scheme may differ from that of the faculty in which you are registered.** In particular, it is significantly different from the Undergraduate Grading System chart in the University of Calgary Calendar <http://www.ucalgary.ca/pubs/calendar/current/f-1-1.html>

This is because (as noted in the Calendar) "University policy requires that students' grades in a course are reported according to the grading scheme of the faculty or school giving the course (regardless of the faculty or school in which a student is registered) and are so recorded on students' transcripts of record."

## Grading Scale

Grade	Grade Point Value	4-Point Range	Percent	Description
A+	4.00	4.00	95-100	Outstanding - evaluated by instructor
A	4.00	3.85-4.00	90-94.99	Excellent - superior performance showing comprehensive understanding of the subject matter
A-	3.70	3.50-3.84	85-89.99	Very good performance
B+	3.30	3.15-3.49	80-84.99	Good performance
B	3.00	2.85-3.14	75-79.99	Satisfactory performance
B-	2.70	2.50-2.84	70-74.99	Minimum pass for students in the Faculty of Graduate Studies
C+	2.30	2.15-2.49	65-69.99	All final grades below B- are indicative of failure at the graduate level and cannot be counted toward Faculty of Graduate Studies course requirements.
C	2.00	1.85-2.14	60-64.99	
C-	1.70	1.50-1.84	55-59.99	
D+	1.30	1.15-1.49	50-54.99	
D	1.00	0.50-1.14	45-49.99	
F	0.00	0-0.49	0-44.99	

**For students registered in the Faculty of Graduate Studies ONLY:** A student who receives a "C+" or lower in any one course will be required to withdraw regardless of their grade point average (GPA) unless the program recommends otherwise. If the program permits the student to retake a failed course, the second grade will replace the initial grade in the calculation of the GPA, and both grades will appear on the transcript.

## Notes:

1. Written work, term assignments and other course related work may only be submitted by e-mail if prior permission to do so has been obtained from the course instructor. Submissions must come from an official University of Calgary (ucalgary) email account.
2. Academic Accommodations. Students who require an accommodation in relation to their coursework or to fulfil requirements for a graduate degree, based on a protected ground other than disability, should communicate this need, preferably in writing, to their Instructor or the designated contact person in EVDS, Jennifer Taillefer ([jtaillef@ucalgary.ca](mailto:jtaillef@ucalgary.ca)). Students who require an accommodation unrelated to their coursework or the requirements for a graduate degree, based on a protected ground other than disability, should communicate this need, preferably in writing, to the Vice-Provost (Student Experience). For additional information on support services and accommodations for students with disabilities, visit [www.ucalgary.ca/access/](http://www.ucalgary.ca/access/)
3. Plagiarism - Plagiarism involves submitting or presenting work in a course as if it were the student's own work done expressly for that particular course when, in fact, it is not. Most commonly plagiarism exists when:(a) the work submitted or presented was done, in whole or in part, by an individual other than the one submitting or presenting the work (this includes having another impersonate the student or otherwise substituting the work of another for one's own in an examination or test),(b) parts of the work are taken from another source without reference to the original author,(c) the whole work (e.g., an essay) is copied from another source, and/or,(d) a student submits or presents work in one course which has also been submitted in another course(although it may be completely original with that student) without the knowledge of or prior agreement of the instructor involved. While it is recognized that scholarly work often involves reference to the ideas, data and conclusions of other scholars, intellectual honesty requires that such references be explicitly and clearly noted. Plagiarism is an extremely serious academic offence. It is recognized that clause (d) does not prevent a graduate student incorporating work previously done by him or her in a thesis. Any suspicion of plagiarism will be reported to the Dean, and dealt with as per the regulations in the University of Calgary Graduate Calendar.
4. Appeals: If a student has a concern about the course, academic matter, or a grade that they have been assigned, they must first communicate this concern with the instructor. If the concern cannot be resolved with the instructor, the student can proceed with an academic appeal, which normally begins with the Faculty:  
<http://www.ucalgary.ca/provost/students/ombuds/appeals>
5. Information regarding the Freedom of Information and Protection of Privacy Act (<https://www.ucalgary.ca/legalservices/foip>)
6. Emergency Evacuation/Assembly Points (<http://www.ucalgary.ca/emergencyplan/assemblypoints>)
7. Safewalk information (<http://www.ucalgary.ca/security/safewalk>)
