

Reimagining Housing & Cities Symposium

10:00 am - 4:00 pm
Wednesday, May 8
City Building Design Lab

SCHOOL OF
ARCHITECTURE,
PLANNING +
LANDSCAPE

Canada needs 5.8 million new homes by 2030 to restore housing affordability. Cities have a historic opportunity to improve housing outcomes for a fast-growing population by encouraging provision of a variety of homes across the housing continuum to make our cities more inclusive and resilient. *Reimagining Housing & Cities* symposium highlights critical planning and design strategies to address these challenges through housing market stabilization policies, transit-oriented development, investment in affordable housing and citywide rezoning. The event encourages partnerships for change and action to address the housing affordability crisis in Calgary.
